

**4Mation® is a powerful seed placement program.**

4Mation creates a custom seed placement prescription based upon key variables that affect your crops performance. Through years of proven research we have developed an advanced system to help streamline and revolutionize the variable rate seeding process.

Prescriptions are delivered on a field by field basis taking into account unique issues that apply to each field. These prescriptions are then delivered in an equipment ready format. 4Mation is a product designed to maximize and unlock the true potential of your fields.

**Custom Seeding Rates**

*Unique rates placed on a field by field basis to maximize results.*

**Improved Yield Performance**

*Increased yield opportunity based on optimal seed placement.*

**Equipment Ready Exports**

*Export formats compatible with industry leading controllers.*

**Recommendation Suited to Each unique Field**

*Field by Field evaluation helps target unique circumstances for every situation.*
